

Data Transfer Agreement ELAN data (outside CBS environment) (July 2026)

LUMC/PHEG/ELAN Representatives

Prof. dr. H.M.M. Vos, Prof. dr. J.N. Struijs, Associate Prof. dr. D.O. Mook-Kanamori
Department of Public Health and Primary Care
Leiden University Medical Center, Leiden, the Netherlands
E-mail: elan@lumc.nl

Conditions

1. One of the ELAN-datamanagers will provide the researcher with a subset of data that conforms to the protocol specified in the researcher's data application.
2. Data will be [made available on the LUMC-network in a secured folder, or \(in exceptional cases\) upon request in a password-protected archive and transferred through a secure connection.](#)
3. [The Researcher is responsible for the data and will ensure that all technical and physical safeguards are taken to protect the data from any unauthorized access or use.](#)
4. Issued data will be used exclusively for the objective or research question described in the researcher's data application.
5. The researcher will not provide access to these data to another person without the consent of the ELAN steering committee. The researcher will not make any copies of the data or remove them from the secured folder or agreed to archive.
6. The researcher is familiar with the Dutch GDPR (General Data Protection Regulation) and will comply with the provisions of this regulation.
7. The researcher will not disclose any information received in confidentiality related to the research project. The same applies to information put at the researchers' disposal of which can be expected to understand the confidential character. The researcher shall not carry out any procedures with the data (linking, comparison, processing) through which the identity of a patient could be derived.
8. The researcher will follow the guidelines as described in the guidance document. These refer to annual updates on progress, publication policy, and archiving. In short:
 - a. Provide annual updates of progress on the project.
 - b. Before submitting a paper, adhere to the ELAN publication guidelines
 - c. When analyses have been completed, the researcher is responsible for the reproducibility of the results as presented in the publication by archiving in the appropriate repositories (or LUMC environment). Furthermore, syntaxes must be made public through at least one of ELAN's channels, unless there is a valid reason not to do so.
9. The researcher is responsible for financing the costs incurred within ELAN.
10. The supervisor who signed this document **will become responsible for** the above mentioned conditions in case the researcher no longer actively participates in the research project. In case the supervisor leaves the project, the replacement of the supervisor is responsible.

By signing this Data Transfer Agreement, the the Researcher and the Supervisor agree with the above mentioned conditions to [exchange ELAN data](#).
