

Work Instruction: Working with ELAN-CBS (CBS-RA) on an LUMC departmental computer

Version: 2.0

Last update: 29 April 2026

Authors: Aidan Kloots & Ronald Hakkenbrak

1) Preconditions

- You have an active CBS Microdata / CBS-RA account, including MFA (as required by CBS).
- You are working on an LUMC departmental computer (local PC) connected to the LUMC network (wired or LUMC Wi-Fi).
- You can log in to the PC using your LUMC account.

2) Request FortiClient and have it installed via Topdesk

Open Topdesk and create a new request with the IT&DT Helpdesk (general call/question). Use the text below (copy/paste) and fill in the details:

Please install FortiClient on the following LUMC departmental computer for access to CBS-RA (ELAN-CBS).

- *Computer name: [FILL IN]*
- *Asset number: [FILL IN]*
- *Location/room: [FILL IN]*
- *Department/cost center: [FILL IN]*
- *User(s): [FILL IN]*

Wait for confirmation or an appointment from IT&DT. IT&DT will install FortiClient and, where necessary, apply the correct permissions/configuration on the PC.

3) Configure FortiClient according to CBS Microdata

1. Open FortiClient on the departmental computer.
2. Select “Configure VPN” or “Add a new connection”.
3. Follow the CBS Microdata instruction (as received via the CBS portal or email).
4. When prompted, use the setup password: “cbsforti”.
5. Save the connection as “CBS-RA” (or another recognizable name).

4) Log in and work in CBS-RA

1. Ensure the departmental computer is connected to the LUMC network (wired or LUMC Wi-Fi).
2. Open FortiClient and connect to “CBS-RA”.
3. Sign in with your CBS credentials and MFA.
4. Start the CBS-RA workspace/environment according to the CBS instruction.
5. Work within the CBS-RA environment

5) Frequently asked questions & issues

FortiClient will not connect:

- Check the server/gateway and port exactly as stated in the CBS instruction.
- Verify your CBS username and MFA.
- Confirm that the PC is on the LUMC network (not a guest network).

Certificate or driver error:

- Ask IT&DT to verify that FortiClient and the required certificates are installed correctly.
- If there are changes/maintenance on the CBS side, contact CBS Microdata support (via the CBS channels).

6) Security and policy

- Use the CBS-RA environment exclusively for microdata work in accordance with CBS terms and conditions.
- Do not store microdata locally on the departmental computer.
- Do not share accounts, tokens, or passwords, and do not leave the PC unattended while you are logged in.

7) Contact

- IT&DT: Topdesk self-service portal (internal link), phone 071 52 64 747, service desk location J-01-015 (route number 541).
